Float Scam

A short UK guide to reporting suspicious adverts and websites

Where to email

AWS / CloudFront	**trustandsafety@support.aws.com**	Suspected abuse of AWS services.
Suspicious emails	**report@phishing.gov.uk**	Forward the original email to the NCSC.
Consumer concerns	**general.enquiries@cma.gov.uk**	For wider consumer issues, not individual refunds.
Medical devices	**devices.compliance@mhra.gov.uk**	Suspected fake or non-compliant medical devices.

The Internet's FloatScam Gyre

Miracle teeth, fake-capacity drives and offers that are too good to be true. Scam adverts and disposable shopfronts keep circling through our feeds. They form a gyre of online rubbish, ready to catch the next person.

If you see litter, pick it up.
If you see scams, report them.

A clear report gives the platform, host or regulator something specific to investigate. Keeping a copy records that you told them.

1. Keep the evidence. Save the advert link, destination address, screenshot, date and what looks wrong.

2. Tell the right people. Report the advert in the app. Use the relevant email above or reporting link on page 2.

3. Keep the receipt. Save what you sent and any reply or reference number. Follow up if it is still there.

Illustration of typical claims, not a named seller.

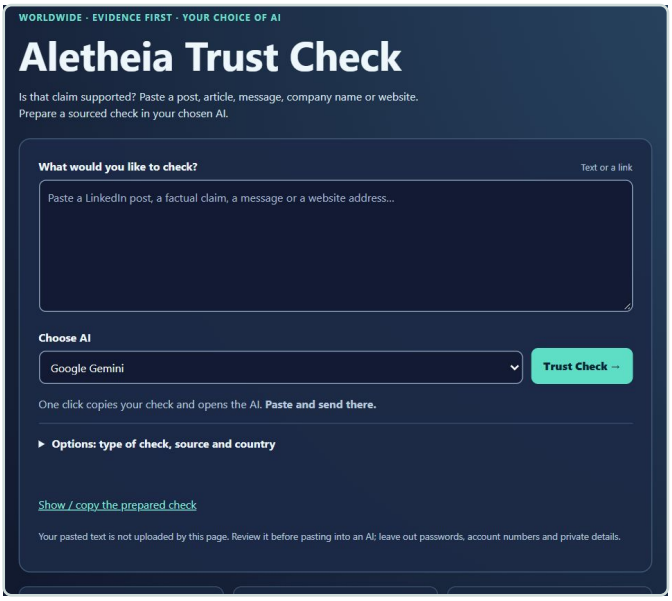

Need help checking it?

Open Aletheia Trust Check. Paste the claim or link, choose your AI, then paste and send the prepared check there. Ask for a short finding, sources and a reporting email you can review and send yourself.

Report what you observed and why it concerns you. You do not have to prove a crime to raise a concern.

Trust Check and reporting links

Open Aletheia Trust Check

Actual opening screen, 30 October 2026.

What you do

Paste the advert, claim, message or web address into the box. Choose your AI and press **Trust Check**. Paste and send the check in the AI window.

What you get

A short finding, evidence links, what remains uncertain and suggested next steps. The AI needs access to the sources; it should say when it cannot check them.

To request reporting emails, add this to your check:

"Draft an email reporting this concern. List the relevant recipients, with the source for each address. Include a subject, the exact links, dates and supporting evidence. I will check and send it myself."

Addresses found on Reddit or forums can be useful leads. Label them unofficial, keep the source link and check who controls them before sending personal details.

Other ways to report

Suspicious website - NCSC
Send the website address through the online form.

Paid scam advert - ASA
Use the scam-ad form; other misleading ads go here.

Facebook, Instagram, WhatsApp
Use Report on the advert, post, message or chat.

Google / YouTube advert
Use the advert's reporting control or official help route.

Scam SMS - forward to 7726
Free. Reports the text to your mobile network.

WhatsApp checker - 07700 153424
Metro Bank / Ask Silver; optional NCSC report. Remove private details.

Fraud or cybercrime - Report Fraud
0300 123 2040: England, Wales and NI. Scotland: police on 101.

Consumer help / Trading Standards
For help with a purchase or referral to Trading Standards.

Lost money? Contact your bank or payment provider straight away.
